
Project: CarShop – Automotive E-Commerce UI (Figma-to-Flutter)

CarShop is a high-fidelity automotive marketplace application developed with a focus on "pixel-perfect" UI implementation. This project demonstrates my ability to translate complex **Figma designs** into a fully responsive and interactive **Flutter frontend**, ensuring every detail—from typography to spacing—matches the original design specifications.

Core Features & Functionalities

- **Figma-to-Code Implementation:** Successfully converted a multi-screen Figma prototype into clean, maintainable Flutter widgets with 100% design accuracy.
- **Comprehensive User Onboarding:** Professional authentication flow including **Splash Screens**, **Multi-language Support (Arabic/English)**, and a complete **Password Recovery** system.
- **Advanced Catalog Discovery:** A dynamic search and filter interface allowing users to find parts based on specific vehicle attributes like **Brand, Model, and Year**.

- **E-Commerce Workflow:** A streamlined shopping experience featuring a **Custom Cart** (with quantity management), **Address Selection**, and a realistic **Payment Gateway** UI.
- **Navigation & Profile Management:** Implemented a custom **Navigation Drawer** and a dedicated **Notification Center** for a seamless user journey.

Technical Skills Demonstrated

- **Pixel-Perfect UI/UX:** Expert use of Flutter's layout system (`Stack`, `CustomScrollView`, `GridView`) to replicate complex Figma designs.
- **Clean Architecture (Frontend):** Organized widget tree and reusable components for better scalability and code readability.
- **Asset Optimization:** Integrated custom SVG icons and high-resolution images while maintaining app performance.
- **Stateful UI Interactions:** Managed complex UI states for buttons, form validations, and interactive lists.

Note:

*This is a **Frontend-only project** specifically built to showcase my ability to bridge the gap between design and development. It highlights my proficiency in creating production-ready UIs directly from professional Figma prototypes.*
